Adnan Menderes University

Business Administration

About Me

I am a dynamic and creative frontend developer. I build web applications passionately and with self-discipline. I have a strong sense of visual aesthetics and enjoy working with modern web technologies. I am experienced in designing and developing user-friendly interfaces. I am adaptable to teamwork and capable of managing project processes. I am constantly open to learning and selfimprovement.

Professional Experience

MimCode | Front-End Developer

2023 – Present

Key responsibilities:

- Front-end designs with HTML5, CSS3, , React, JS
- Versioning with Git/Github
- Contributed to the work as a team and individually
- User-friendly interfaces were designed and continuously improved
- Created technical documentation and collaborated with other developers as needed
